The invention of lithography by Alois Senefelder in 1796 made possible the production of books without the use of metal or wooden type. It revolutionized publishing, making it possible to reproduce short-hand symbols, calligraphy, facsimiles, maps & military plans, music, accounting tables, and other sorts of hand-drawn material cheaply and efficiently. The result of twenty years of scholarship by Michael Twyman following the 1970 publication of his book, Lithography, 1800-1850 by Oxford University Press, this remarkable book is the first to give a comprehensive history of early books produced by the application of Senefelder's method and in addition to the extensive text, the book features a bibliographic catalogue of over 420 lithographed books from the nineteenth century. Each entry has a full collation, publication price (when available), and other useful annotations. It is the first such catalogue of early lithographed books available and is extremely useful to collectors, booksellers, librarians, and scholars interested in the field. The comprehensive text includes chapters on Lithographic incunables; Military manuals: the presses at Chatham and Metz; The lithographic publications of Sir Thomas Phillipps; Books on accounting and other 'difficult composition'; Music method books; Non-latin scripts; Lithography and phonography: The books of Isaac Pitman; Books with pictures; Reprints of books and facsimiles of old documents; Facsimiles of autographs; and Photolithographed facsimiles and reprints, etc.* #36270 **A\$145.00**

Hogg, at the Original King's Arms, No. 16, Pater-Noster-Row. Cr. folio; pp. iv, [5]-656 (last unnumbered), [4] (List of Subscribers); folding chart of the world and 156 full-page charts and plates agreeing exactly with the list at end; full contemporary calf (expertly re-jointed & with minor repairs to extremities; the folding chart with some neat tissue repairs & re-folded; about a dozen plates with neat marginal repairs; all plates & charts with imprints and captions entire with the sole exception of the plate at Page 640 which has the caption just shaved); an unusually good, and quite complete, copy of a book very difficult to obtain in fine, complete condition. London; Printed for Alex. Hogg; N.D. [c. 1786]. ****In addition to Cook's voyages, the work contains (between the accounts of the second and third voyages), accounts of the voyages of Byron (pp. 215-252), Wallis (pp. 252-274), Carteret (pp. 275-314), Phipps (pp. 315-335), Anson (pp. 336-370) and Drake (pp. 371-398). See Beddie 17-19; Hill, pages 5-6 (No. 18 in the second edition); Forbes 61. This copy appears to conform most closely to Beddie 19 and to Forbes 61 State II. The work, first issued or commenced in 1784, was reissued many times over a period of over 20 years and many minor differences are found between copies including the precise wording of the title-page and some variation in the number of listed maps and plates. In addition many copies seem to have been issued (or compiled) without the full complement of illustrations, up to a dozen or so being often lacking. As advertised by the publisher at the foot of Page 655, it was available both in 80 sixpenny parts or as a complete volume bound in full calf. In this copy, the list of illustrations on Page [656] lists 157 charts and plates in total - these are all present and are placed throughout at the appropriate locations (plus or minus a page) with the sole exception of the plate specified for Page 230 which is instead at Page 136. In addition this copy contains the four-page List of Subscribers, rarely present. Beddie 19 refers to a copy with the frontispiece dated 1781, which on first examination appears to be also the case with this copy, but we believe the date is in fact 1784 (as noted by Forbes - State II), with the digit 4 imperfectly printed. #33081* **A\$5500.00**

M,DCC,LXXXIV. 3 vols., demy 8vo, text & 1 vol. med. 4to, Atlas; Vol. 1, pp. [viii], xcvi, 422 (last blank); portrait of Cook by Dance as frontispiece; Vol. 2, pp. [xvi] (first 2 blank), 552 (last 3 blank); Vol. 3, pp. [xii] (last blank), 560 (last blank); folding comparative table of numbers expressed in various languages of the Malay region; 6 other appendices; Atlas, 25 (of 26) folding and full-page charts and coastal views; text vols. in full contemporary tree calf with contrasting spine labels; (spine ends with very slight wear & a couple of small defects to leather); atlas in contemporary quarter calf, with marbled sides (spine a little worn, with a small defect at top); generally very fine, clean and crisp; an excellent set. Dublin; Printed for H. Chamberlaine [etc.]; 1784. ****Beddie 1546; Forbes 72.*

Although the title refers to maps and charts and there is at the end of the preliminaries to the first volume a two-page list of 26 charts and views with directions for their placement throughout the three volumes, the text volumes contain only the frontispiece to Vol. I and this is not listed. The charts and views were never present in these text volumes and this is clearly one of the forms in which the book was issued — we have handled a similar set (without Atlas) before. Beddie notes that the Baillieu Library copy is similar, having only the portrait frontispiece. This set carries the bookplate of John B. Gilmore on the front pastedown of all three text volumes and his contemporary inscription dated Boghead Janry. 1st 1789. The Atlas in similar, but not quite matching, contemporary quarter calf, with marbled sides, carries the bookplate of David Rochfort and a contemporary manuscript list of the charts and views contained therein. The individual charts carry corresponding manuscript numbers (1-25). The printed numbers (roman numerals) on the charts and the directions for placing them (in the text volumes) generally correspond with the list printed in text Volume I, but there are several discrepancies and internal inconsistencies (to the Atlas). Plate XVI, Views on the West coast of North America, to the Westward of Cook's River, is lacking; Plate II is numbered IV (as is also Plate IV); Plate XIX is numbered XVI and there is no plate numbered XIX. While clearly contemporary and intended to accompany the text volumes, the Atlas was almost certainly matched to this set at a later date and there is no indication the missing chart was ever present. #20444
