
907pp. Quarto [28.5 cm] in decorative green cloth with gilt titles. Ex-library, with library spine label and pocket removed (leaving light residue on spine and front pastedown, respectively). Light soiling to boards; rubbing to extremities; excepting light library markings, interior is unmarked. B&W photographs and illustrations. [51491] $650

*This unassuming-looking medical textbook provoked a great deal of controversy with its inclusion of highly sexualized nude photographs of women, along with the objectification and dismissal of women in the text itself. Accounts conflict as to whether the book was actually removed from shelves by the publisher, or if it was allowed to die a natural death in the marketplace. Either way, it was resoundingly panned, little-used, and never had a second printing. At the time it was published, women comprised about 10% of medical students.*
